Introducing Unicorn Coin

The Unicorn image has stayed with the human kind for thousands of years, symbolising mythically devine power.

Nowadays, the Unicorn brings feelings of joy, satisfaction, safety and care-free feelings.

Who doesn't love Unicorns ?

They are those wonderful mystical creatures, surrounded by rainbows ,good emotions and happy thoughts.

The Unicorn trend is a combination of a lot of factors. For us, Unicorns are a fun, carefree symbol of our youth and in confusing times ,the Unicorn brings us hope and positivity.

That is why everybody who wants a Unicorn, should be able to get a Unicorn.

1 Unicorn = 1 Unicorn Coin

Unicorn Coin is the token of The Unicorn.

Each coin represents your own personal Unicorn. You can get as many as you want and later trade them for other coins or tokens, such as bitcoin or ether .

The Unicorn is such a symbolyc image that the demand for unicorns can never be fully met, so there is a limited amount of Unicorns and Unicorn Coins.

Why Unicorn Coin

Using the cryptographic breakthrough of the blockchain ledger and anonymous cryptocurrencies, Unicorn Coin has been developed with the idea to become a widespread, stable, multipurpose, secure and easy to use cryptocurrency.

Unlike other cryptocurrencies, Unicorn Coin has the unique advantage of responding to the global spread affection to The Unicorn as a mythical and magical creature.

Unicorn Coin investors can gain from the competitive advantage of being able to possess a cryptocurrency, which is based on the ever loving and inherently magical image, while simultaneously benefiting from low transaction costs and maximum transparency and security.

For the past 2 years the Unicorn trends have been constantly expanding and connecting to all types of business and products, ranging from card games to Starbucks drinks, everything which is connected to the Unicorn image turns into a huge success.

Unicorn Coin is based on the profound idea that for a cryptocurrency to exist and be useful to the people, it needs to be formed around a community. The Unicorn community is ever expanding, which means that a cryptocurrency based on the

Unicorn symbol would be a **safe bet**.

Unicorn Coin

Unicorn Coin is an ERC-20 token. It will be minted during the crowdsale in exchange for Ether and not be minted in any way after the crowdsale closes.

The coin's purpose is to represent a Unicorn to each of its holders, as well as ;

- Allowing for the exchange with the other cryptocurrencies and tokens, such as bitcoin, ether and ripple.

- Represents a Unicorn, which you own. The more coins you have, the bigger your Unicorn herd will be.

Timeline

Token Allocation-

The seed token creation will be capped at 30,000,000 Unicorns

Unicorn Coin (UCC) is distributed at the price of 500 Unicorns = 1 Ether (ETH)

The token allocation and the sale of the unicorns will happen in the period of 42 days, and after that no additional Unicorns will ever be created.

Price Expectations until 2020.

After the ICO and the huge demand, we predict that Unicorn Coin will be traded for between \$6- \$12 on the crypto exchanges. By the beginning of 2019 our calculations and predictions show the price to be \$120- \$200, while for 2020 the Unicorn predictions are \$1000-\$3000 per Unicorn Coin.

That way, early adopters of Unicorn Coin see true benefit for their investment.

Trading Unicorn Coin on the Exchanges

It is essential that followers of the Unicorn Coin be able to freely exchange and speculate on the value of Unicorn Coin, especially as we have the unshakable faith that it's value will rise exponentially.

As such the Unicorn Coin team are in talks with the endeavour of having Unicorn Coin listed on Benance, Bitfinex, Poloniex, Bittrex, Kraken, HitBTC and YoBit in the next 2 months.
